1. DATE - TIME GROUP 15/0030 15 Aug 1978 15/0030Z	2. LOCATION Yellow Springs, Ohio
3. SOURCE Civilain	10. CONCLUSION Astro (MOON) Although Dr J A Hynek feels that the sighting should be evaluated as unidentified or as plasma, the sighting is being evaluated as the moon. Dr Menzel of Harvard University also feels the sighting is of the moon and
4. NUMBER OF OBJECTS 1	
5. LENGTH OF OBSERVATION About 30 minutes	11. BRIEF SUMMARY AND ANALYSIS completed an extensive analysis of the sighting.
6. TYPE OF OBSERVATION Ground-Visual	The observer sighted a large yellow, gold and white light that was about the size of a large moon. The observer estimated that at one time it was only about 300 feet above her car and that a dime at arms length would have covered only 1/50 of it. The observer also said that the object made a groaning noise had a smell similar to the German planes of WW II and seemed to be spinning.

YELLOW SPRINGS, OHIO

August 15, 1968

At approximately 12:30 AM on August 15, 1968, the observer was driving home near Yellow Springs, Ohio when she noticed what appeared to be a luminous, solid, disc shaped object about 300 feet above her automobile. The object was yellow, gold and white in color, it had a spinning motion, and made a groaning noise. The observer estimated that at this time about 1/50 of the object would have covered an aspirin at arms length. The observer stated that the object was apparently following her car lights, because when she moved the object moved, and when she stopped the object stopped. Upon arriving home, the observer went inside to get her in-laws. When the observer and her relatives came out of the house the observer felt that the object had gone straight up because it appeared smaller and she could no longer hear noise. The observer estimated that, at this time about 1/4 to 1/2 of the object would have been covered by an aspirin at arms length. The witnesses first thought the object was the moon but rejected this hypothesis because of the apparent motion of the object and also because of the presence of an odor in the area which they attributed to the object. One of the witnesses stated that the odor was similar in smell to that of WW II German airplane fuel.

Background Data: The duration of the sighting was about 1/2 hour and during this time the object was seen basically in the NE to ENE sky. All the witnesses stated that the object was similar in shape to the moon but did not feel it could have been the moon, principally because it appeared to move. None of the observers saw the moon, despite the fact that the moon was well above the horizon in the eastern sky during the sighting. There was a strong temperature inversion in the area at the time of the sighting. Temperature inversions often distort stellar images, cause color changes of stars (scintillation), and may cause stellar images to appear to move somewhat. No one else reported any similar observations to the Yellow Springs Police Department, the Greene County Sheriffs Office, or at Wright Patterson AFB.

Comments: Although Dr J Allen Hynek, the Air Force Scientific Consultant on UFO's, feels that the sighting should be evaluated as plasma or unidentified, the Air Force feels that the sighting was of the moon and that the apparent movement was caused by weather conditions at the time of the sighting which stimulated the observers to be effected by autokinetic illusion. Dr Donald Menzel of the Harvard College Observatory completed an extensive analysis of the sighting and also feels that the observation was of the moon.

21
9 December 1968

Mr Mallan;

In regards to the [REDACTED] case of 15 August 68,
Yellow Springs, Ohio. [REDACTED] transcript from Dr
Hynek interviewing the [REDACTED] observers will not be
published. *WITHOUT HIS PERMISSION*

UFO Sighting, 15 August 1968, Yellow Springs, Ohio

Dr J Allan Hynek

1. Thank you for your transcript of your conversation with the
Foggs, relative to their UFO sighting of 15 August 1968. Did
you gain any additional information from your personal interview
with them in Cincinnati?

2. In the interest of seeing that you receive full credit for
your efforts on this case, we would like you to complete the
Inclosed Project Card, to include your evaluation.

HECTOR QUINTANILLA, Jr, Lt Colonel, USAF
Chief, Aerial Phenomena Branch
Aerospace Technologies Division

GREENE COUNTY, OHIO

Established 1803

421 square miles in area

115 miles of state highways

375 miles of county roads

372 miles of township roads

Geographical low point, south county line and Little Miami River. Elevation - 730 feet.

Geographical high point, 2.2 miles west of the northeast corner of the county, on the county line. Elevation - 1120 + feet.

County seat, Xenia, Ohio

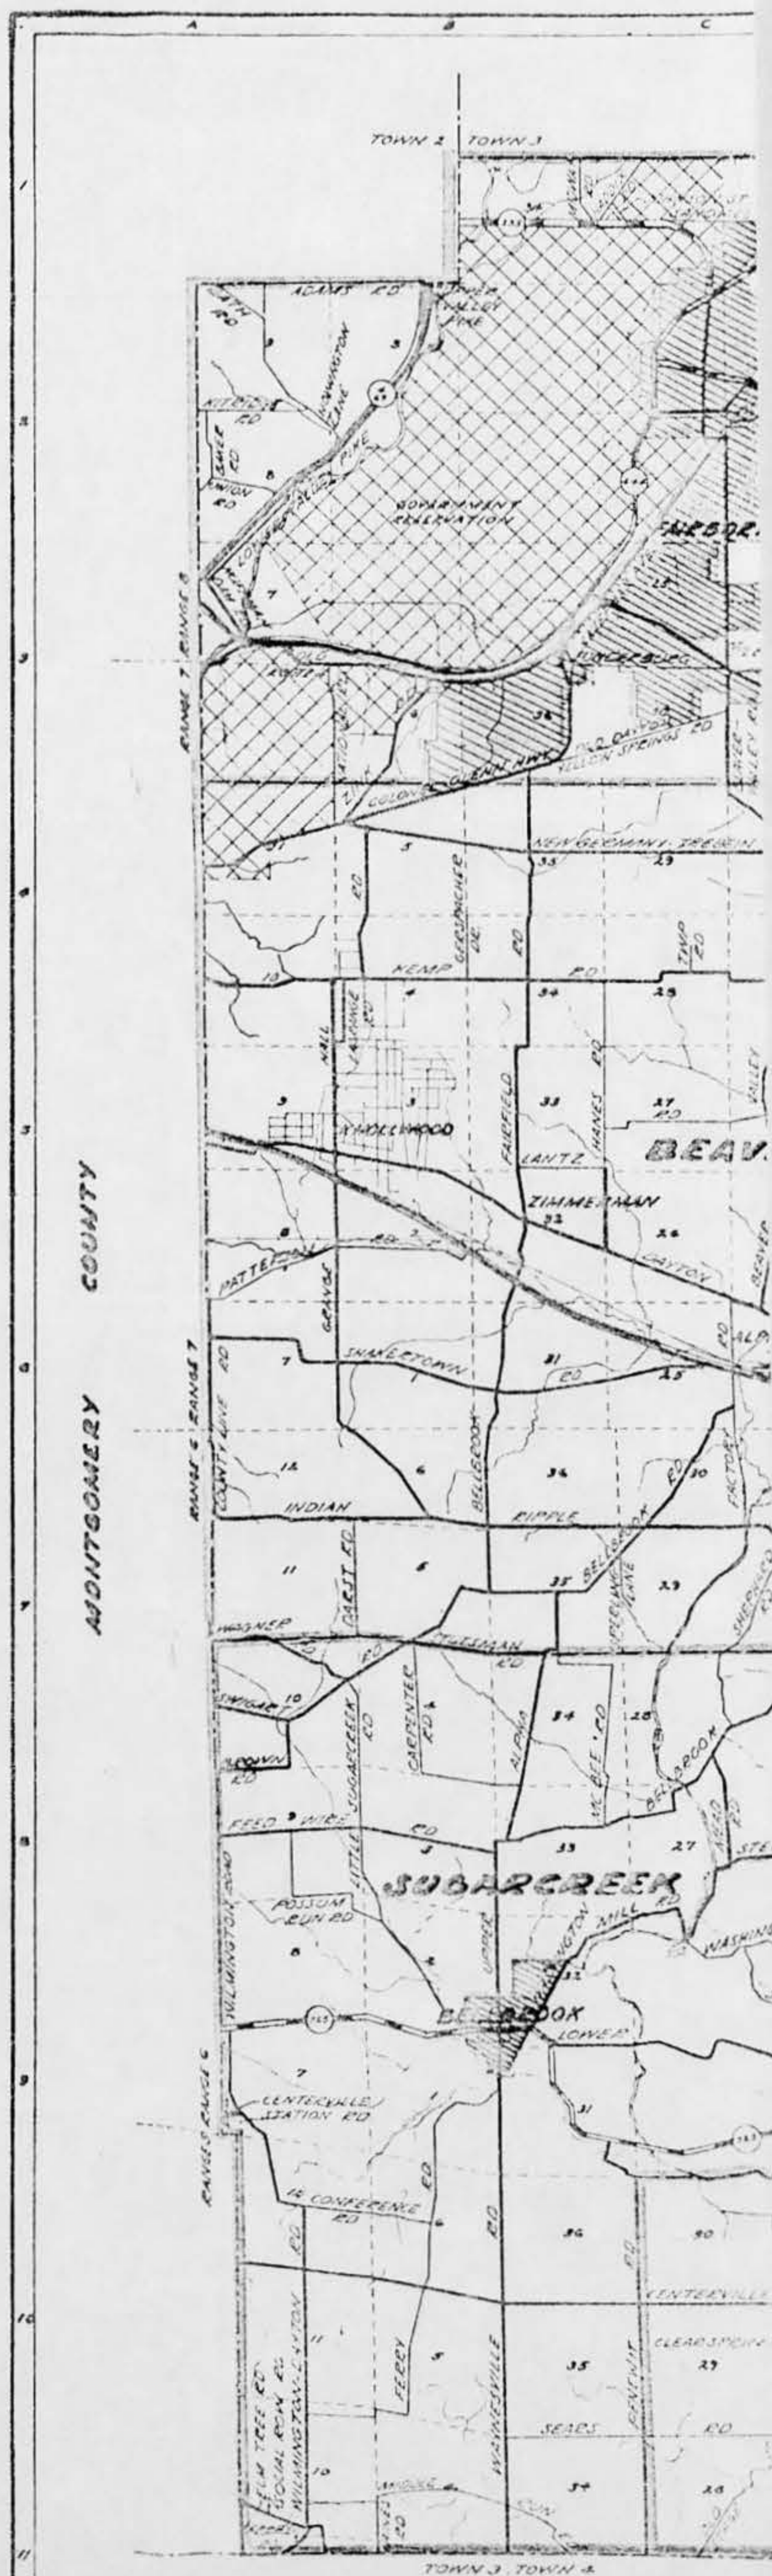

Population, 1960 census 94,642

Greene County, Ohio, named for General Nathaniel Greene War hero, was established in its present boundaries in 1803, admitted to the Union in 1803. Greene County stretched from the south to the then north line of the new state.

The oldest settlement in Greene County appears to have been Chillicothe (now Old Town), a village of the Shawnee Indians, with a population of 1100 persons around 1778. The first white settlement was founded by John Wilson and his sons, Amos, John, George, each built a log shelter at Clio (now Ferry) in the southwest corner in 1796.

The first county business was transacted in a small log building a quarter of a mile from Alpha on the banks of the Beaver Creek. A house in Xenia was finished in 1809 at a cost of \$3,396. The courthouse was built in 1902 at an approximate cost of \$192,000.

Xenia, which was established as the county seat in 1803, is the Greek and signifies hospitality.
